GRADUATE AGRONOMIST

Sustainable Liquid Technology (SLTEC) is a leader in the development, manufacture and supply of liquid fertilizer solutions for the agricultural industry. The Company's core focus involves the development and supply of Liquid Fertilizer Technology to assist farmers achieve high performance productivity and quality outcomes, sustainably. The business is experiencing rapid growth and development across rural Victoria, Southern NSW and in the South Australia.

Position Title: Graduate Agronomist (Goulburn Valley)

A Graduate Agronomist position is now available in the Goulburn Valley. This role offers a challenging opportunity in a rapidly growing market place for an agronomist with a hunger to learn and grow. The successful applicant will be part of an established, dynamic and highly motivated team with more than 150 years experience, responsible for delivering a portfolio of integrated liquid fertilizer products and services. This role will provide opportunities to develop technical and leadership skills and work with our dealer agronomy and sales team.

Candidates need to be able to demonstrate;

- A degree in agriculture, horticulture, soil science, irrigation or related disciplines
- Excellent communication and interpersonal skills
- A sound knowledge of soil science, horticulture or broad acre agronomy, fertilizer technology, fertigation and irrigation systems design and management

A competitive salary package, performance incentives and benefits will be negotiable for the successful applicants depending on experience and qualifications.

A position description can be obtained upon request. Applications close on the 4th December 2009. Send letters of application and CV's to;
